

## **European Association of Geochemistry** **Agreement to publish in *Geochemical Perspectives Letters***

Title of Article

Chondritic chlorine isotope composition of acapulcoites and lodranites.

Corresponding Author

Alice Stephant

Name(s) of Co-Author(s)

Mahesh Anand, Cristian Carli, Xuchao Zhao, Jemma Davidson, Tiberio Cuppone, Giovanni Pratesi, Ian A. Franchi.

Research funded by:

- European Union's Horizon 2020 research and innovation program under the Marie Skłodowska-Curie grant agreement n°884029.
- European Union's Horizon 2020 research and innovation programme under grant agreement N° 871149 to access the Open University NanoSIMS through the EuroPlanet programme (award code 20-EPN2-01).
- ASI INAF/ASI agreement n°2018-16-HH.0, OI-BODIES project
- UK Science and Technology Facilities Council (STFC) (#ST/X001180/1 #ST/T000228/1)

### **Statement of rights and acceptance of conditions of publication by the Corresponding Author on behalf of all authors of the article**

The Corresponding Author warrants on behalf of all the authors of the article that the work is his/her/their original work, has not been published before, and is not currently under consideration for publication elsewhere, and that it contains no libellous or unlawful statements and that it in no way infringes the rights of others.

The European Association of Geochemistry is empowered to make such editorial changes as may be necessary to make the work suitable for publication in printed and electronic form. The Corresponding Author will be consulted if changes are required. No changes to the work may be made after the date of first publication, whether in print or digitally, other than for gross factual errors, breach of third party copyright, or content that is defamatory or otherwise unlawful.

### **Open Access and Open Access Contribution** (*tick one box only*)

All articles published in *Geochemical Perspectives Letters* will be made Open Access and are therefore freely available to any user.

When articles are accepted for publication, authors are given the option to publish at no charge OR to make an Open Access Contribution of 1250 Euros (articles will be open-access either way). **If your funding body or institution provides funds to cover Open Access publication, we strongly urge you to consider making an Open Access Contribution to *Geochemical Perspectives Letters*.** Contributions received will be directly

attributed to covering the expenses associated with producing *Geochemical Perspectives Letters*, a fully open-access publication created by and for the geochemical community.

I wish to make an Open Access Contribution of 1250 Euros, payable by bank transfer to the European Association of Geochemistry or by credit card

I do not wish to make an Open Access Contribution

## License

The Corresponding Author, on behalf of all the authors of the article, hereby grants to the European Association of Geochemistry permission to publish the said contribution in paper, electronic, and facsimile formats, and for electronic capture, reproduction, and licensing in all formats, in whole or in part, now and in perpetuity, in the original and all derivative works.

Articles are published under either (1) Creative Commons Attribution Non-Commercial No-Derivatives 4.0 International (CC BY-NC-ND 4.0) License OR (2) Creative Commons Attribution 4.0 International (CC BY 4.0) License.

Under both licenses, copyright remains with the authors, who are therefore authorised to archive the article on their own website or in a subject or institution repository from the date of its publication, provided a link to the original article is included. Please ensure that the license type chosen complies with any requirements specified by your funding body.

### Please select your license (tick **one** box only)

If no choice is specified, the article will be distributed under (1) CC BY-NC-ND 4.0 License.

(1) Distribution under Creative Commons Attribution Non-Commercial No-Derivatives 4.0 International (CC BY-NC-ND 4.0) License

Anyone is free to share (copy and redistribute) the material in any medium or format provided that appropriate credit is given to the original author and publication, a link to the license is provided, and a mention is included if changes were made. Under the CC-BY-NC-ND 4.0 License, the material cannot be used for commercial purposes\*, and if the material is adapted (remixed, transformed, or built upon), the modified material cannot be redistributed\*. More information about the CC BY-NC-ND 4.0 License can be found [here](#). \*Written permission from the original author must be obtained for such purposes.

(2) Distribution under Creative Commons Attribution 4.0 International (CC BY 4.0) License

Anyone is free to share (copy and redistribute) the material in any medium or format, and to adapt (remix, transform, and build upon) the material for any purpose, even commercially, under the condition that appropriate credit is given to the original author and publication, a link to the license is provided, and a mention is included if changes were made. More information about the CC BY 4.0 License can be found [here](#).

The Corresponding Author warrants that appropriate permission has been obtained for all material in the article that was not created by the Author(s) and that everything in the article is compliant with type of the Creative Commons License selected.

Signed ..... *Alice Stephant* ..... Date 19/01/2024 .....
