Dear Matteo D'Andrea,

Your invited paper, entitled: *The TES based Cryogenic AntiCoincidence detector of ATHENA X-IFU: validation of the thermal end-to-end simulator towards the updated Demonstration Model (DM 1.1)*, has been accepted with 7+1 pages and will be published as a 7-page paper. A fee for the 7th pages applies at US \$110.

You can make payment via credit card (Visa, MasterCard, Discover, AMEX), check, or wire transfer. For wire transfers, a US \$15 incoming wire fee will be applicable.

Please let us know what payment method you will be using so we can send you the appropriate invoice.

Please note that payments will be collected by the Applied Superconductivity Conference (ASC), not IEEE. Voluntary page charges (or over-length article fees) processed by IEEE (if indicated via the Author Gateway) are not the same as the mandatory additional page charges processed by ASC.

If you have any questions, please let us know.

Thank you,

Christina
